

PLANT-BASED CHEESE

GO

COMMERCIAL DECISION

Coconut Cheddar v3

DECISION SNAPSHOT

Commercialization Readiness Report

READINESS STAGE

Developing evidence · Buyer preparation

DIRECTIONAL CONCEPT VISUAL

CORE STRENGTH

Overall sensory acceptance (84/100) gives the product a credible lead proof point.

MAIN WATCH POINT

Texture resilience: Reduce late-stage gumminess and confirm melt performance after pilot-scale processing.

RECOMMENDED NEXT ACTION

Advance Coconut Cheddar v3 into pilot-scale confirmation, packaging refinement, and a targeted buyer review.

Executive Summary / Commercial Readout

A decision memo for product, R&D, design, and commercial leaders.

DECISION

Coconut Cheddar v3 should advance into controlled commercialization preparation.

RATIONALE

The saved GO decision is supported by an ISSF score of 82.4 and 86% model confidence. Overall sensory acceptance leads at 84/100; Texture performance is the lowest dimension at 68/100.

COMMERCIAL IMPLICATION

Acceptance is strong enough to lead the buyer story with the product experience. The team should keep the buyer narrative anchored in tested sensory performance while treating concept feedback as developing evidence.

NEXT MOVE

Advance Coconut Cheddar v3 into pilot-scale confirmation, packaging refinement, and a targeted buyer review. In parallel, close the watch points and approval gates listed in the commercialization plan before external distribution.

Product Performance Dashboard

Performance is shown as a commercial decision aid: each result states the evidence and the action or story it supports.

OVERALL SENSORY ACCEPTANCE

84/100

EVIDENCE

Saved sensory decision model

BUSINESS IMPLICATION

Acceptance is strong enough to lead the buyer story with the product experience.

TEXTURE PERFORMANCE

68/100

EVIDENCE

Saved sensory decision model

BUSINESS IMPLICATION

Texture is viable but should be protected through formulation and scale-up controls.

PANELIST-SELECTED SENSORY DESCRIPTORS

81/100

EVIDENCE

creamy, familiar cheddar, versatile

BUSINESS IMPLICATION

Panelist language provides usable vocabulary for concept copy and buyer conversations.

POSITIVE EMOTIONAL RESPONSE INDICATORS

77/100

EVIDENCE

Saved sensory decision model

BUSINESS IMPLICATION

The product creates a positive response that can support an engaging, benefit-led story.

PURCHASE INTENT

6.8

EVIDENCE

24 concept responses

BUSINESS IMPLICATION

Use only as a directional signal; repeat with a broader target panel before forecasting demand.

EVIDENCE BOUNDARY

Concept evidence is based on 24 panelist responses. Treat preference and purchase-intent findings as directional until a broader panel is collected.

Key Commercial Insights

The strongest commercial conclusions from the current evidence, translated into decisions for product, design, and go-to-market teams.

1

Overall sensory acceptance is the lead proof point

WHAT THE EVIDENCE SUGGESTS

Overall sensory acceptance is the highest decision dimension at 84/100.

WHY IT MATTERS COMMERCIALY

Acceptance is strong enough to lead the buyer story with the product experience.

RECOMMENDED ACTION

Build the first buyer-facing message around overall sensory acceptance and preserve it through scale-up.

2

Texture performance sets the development agenda

WHAT THE EVIDENCE SUGGESTS

Texture performance is the lowest dimension at 68/100.

WHY IT MATTERS COMMERCIALY

Texture is viable but should be protected through formulation and scale-up controls.

RECOMMENDED ACTION

Reduce late-stage gumminess and confirm melt performance after pilot-scale processing. Recheck the dimension after the next prototype.

3

Panel language can sharpen the product story

WHAT THE EVIDENCE SUGGESTS

The leading panelist-selected language is: creamy, familiar cheddar, versatile.

WHY IT MATTERS COMMERCIALY

These words are more credible than invented marketing language because they reflect how the product was actually described.

RECOMMENDED ACTION

Use the strongest two or three terms in concept copy, then verify comprehension with the target audience.

4

Concept evidence should match the size of the claim

WHAT THE EVIDENCE SUGGESTS

Concept evidence is based on 24 panelist responses. Treat preference and purchase-intent findings as directional until a broader panel is collected.

WHY IT MATTERS COMMERCIALY

The direction is useful for iteration, but it is not yet a demand forecast or representative consumer claim.

RECOMMENDED ACTION

Run a broader target-consumer validation before final packaging, volume assumptions, or demand claims.

5

Purchase intent is a gate, not a forecast

WHAT THE EVIDENCE SUGGESTS

Average purchase intent is 6.8 from 24 responses.

WHY IT MATTERS COMMERCIALY

The result can prioritize the next concept round, but panel size and composition limit forecasting value.

RECOMMENDED ACTION

Repeat purchase intent with the defined target consumer and a realistic price/package stimulus.

Concept and Packaging Direction

How the product should be positioned, expressed, and refined before external use.

Everyday Melt

A familiar, versatile plant-based cheddar for weekday sandwiches, burgers, and cooking.

POSITIONING	Familiar cheddar flavor, dependable melt, and everyday versatility
TARGET CONSUMER	Flexitarian households seeking an easy dairy swap without sacrificing familiar flavor
PRICE POINT	\$5.99 per 7 oz pack

DIRECTIONAL CONCEPT VISUAL

Packaging mockup · Bold retail

Directional concept visualization only. Final packaging requires design, claims, and legal approval.

PACKAGING DIRECTION

Use a clean, premium-natural pack with an appetizing melted-use cue and clear everyday versatility.

CORE MESSAGE

Lead with creamy texture, familiar cheddar character, and versatile everyday use.

WHY THIS SUPPORTS THE PRODUCT

The selected visual gives the Everyday Melt direction a concrete shelf and buyer-review stimulus while keeping the product experience central.

REFINE BEFORE EXTERNAL USE

- Confirm hierarchy, mandatory copy, and pack architecture with design.
- Validate price, format, and concept language with the priority consumer.
- Complete claims and legal review before any external or production use.

Commercialization Plan

The decision advances only when each workstream has a named owner, a clear deliverable, and evidence for the next gate.

Workstream	Current read	Required action	Status / owner
Product formulation	GO with open action: Texture resilience	Reduce late-stage gumminess and confirm melt performance after pilot-scale processing.	Open · R&D
Sensory validation	82.4 ISSF; 86% confidence	Confirm the product at pilot scale against the saved decision profile.	Open · Sensory
Texture optimization	68/100 texture performance	Run a focused texture optimization and repeat validation.	Open · R&D
Packaging	Directional concept selected	Finalize structure, hierarchy, materials, and production feasibility.	Open · Design
Claims/legal review	No external claims approval stored	Substantiate and approve every sensory, nutrition, and benefit claim.	Open · Legal
Buyer story	Everyday Melt with developing concept evidence	Build a concise story around the strongest sensory proof point and target use case.	Open · Commercial
Source data/provenance	Decision record and method are traceable	Attach source files, panel definition, and approval record to the final report.	Open · Project lead

NEXT DECISION GATE

Next gate: pilot-scale sensory confirmation plus broader target-consumer concept validation.

Risks and Watch Points

These are the issues most likely to change the commercial decision, weaken the buyer story, or delay launch readiness.

Risk	Commercial impact	Mitigation	Next decision gate
Product risk Texture resilience: Reduce late-stage gumminess and confirm melt performance after pilot-scale processing.	A changed or inconsistent product experience could erode the evidence supporting the GO decision.	Set pilot-scale acceptance ranges and repeat the critical sensory measures.	Pilot validation
Concept/packaging risk Directional packaging may be mistaken for a finished pack.	Buyer feedback may focus on unfinished design choices instead of the product proposition.	Label the stimulus as directional and complete design refinement before external use.	Design review
Claims risk Sensory and concept results do not independently substantiate broad benefit claims.	Unsupported copy creates legal exposure and can undermine buyer confidence.	Create a claim-by-claim evidence matrix and obtain legal approval.	Claims approval
Evidence/source risk Concept read is based on 24 responses.	Directional preference could be overstated as representative demand.	Document panel fit and expand validation before making broad market claims.	Evidence review
Execution risk Owners and completion dates are not stored in the report snapshot.	Open actions can drift across R&D, design, legal, and commercial teams.	Assign one accountable owner and due date to every plan row.	Readiness review

Appendix / Source Record

Traceability fields are retained here so the commercial story remains readable while every decision can still be audited.
